### Q: Is it legal to order medications from international pharmacies?

A: Americans are allowed to import up to a 3 month supply of each of their medications for personal use.

### Q: Is a prescription required?

A: Yes. Just like your local drugstore, we require a valid prescription from a licensed physician.

### Q: What about the quality of the medications?

A: Our medications are of the same quality, purity, and potency as those available in the USA. In fact, many of our medications are manufactured in the USA or produced by American companies in their International facilities. All of our medications are government approved.

### Q: Are you licensed?

A: Yes. All prescriptions are reviewed and filled by government licensed pharmacists and physicians.

### Q: Can I save more money with generic drugs?

A: Yes. Generic medications are of the exact same quality and potency as brand name drugs, but cost less. To maximize savings, with your permission, we will substitute generic drugs where possible.

### Q: What about refills?

A: Our free refill reminder service will call you about 6 weeks before your refill is due so that you can authorize your refill order.

### Q: Are there any duties, taxes, or any hidden fees?

A: No. Prescription medicines from International pharmacies are tax and duty free. You pay only for your medicine and the shipping fee.

### Q: How much is shipping?

A: All your medications will be shipped for a flat rate per order of only \$4.95 from our U.S. pharmacies and \$9.95 from our International pharmacies. We suggest you order all your medications at the same time to save on shipping.
